Resolution No. 368

- d. Archaeological excavations may be permitted subject to the provisions of this shoreline program.

20.30.025 Critical Areas

Critical areas include the following areas and ecosystems: wetlands, critical aquifer recharge areas, fish and wildlife habitat conservation areas, frequently flooded areas, and geologically hazardous areas. Critical saltwater and critical freshwater habitats are also types of critical areas within shoreline jurisdiction.

1. Policies

- a. In assessing the potential for net loss of ecological functions or processes, project specific and cumulative impacts should be considered.
- b. Development standards for density, frontage improvements, setbacks, impervious surface, shoreline stabilization, vegetation conservation, buffers, critical areas, and water quality should protect existing shoreline ecological functions and processes. During permit review, the Shoreline Administrator should consider the expected impacts associated with proposed shoreline development when assessing compliance with this policy.

(For additional policy guidance please refer to Chapter II General Goals and Policies, pgs. 12-15 and Chapter III Management Policies, pgs. 2-4.)

2. Regulations

- a. BMC 19.40—Critical areas (City of Burien Ordinance ~~394623~~, adopted ~~October 20, 2003~~ June 15, 2015) has been reviewed for consistency with Chapter 90.58 RCW and WAC 173-26 and shall apply to the shoreline jurisdiction with the following exceptions:
 - i. The exemptions and exceptions contained in BMC 19.40.070~~(1)~~, ~~(32)~~ & ~~(43)~~ apply only to the critical areas provisions and are not exemptions from substantial development permits. The exceptions contained in BMC 19.40.070 ~~(45)~~ do not apply and are not considered part of the SMP.
 - ii. BMC 19.40.290 ~~(32)~~.B.iii) does not apply and is not considered part of the SMP. For a landslide hazard area buffer of less than twenty-five (25) feet, in addition to the items required in BMC 19.40.120, a shoreline variance shall be required.
 - ~~iii. BMC 19.40.310 (2.H.v) does not apply and is not considered part of the SMP. For a wetland buffer of less than twenty-five (25) feet, a shoreline variance shall be required.~~

~~iv.iii.~~ BMC 19.40.410(2.B) does not apply and is not considered part of the SMP. Filling is prohibited in the Aquatic environment per Section 20.30.001 Figure 4.

~~v. The following types of wetlands are not regulated by the SMP:~~

- ~~a. Small wetlands less than 1,000 square feet and hydrologically isolated;~~
- ~~b. Man-made ponds smaller than one acre and excavated from uplands without a surface water connection to streams, lakes, or other wetlands.~~

~~b. Identification of wetlands and delineation of their boundaries pursuant to this Master Program shall be done in accordance with the approved federal wetland delineation manual and applicable regional supplements. All areas within the City of Burien meeting the wetland designation criteria in that procedure are hereby designated critical areas and are subject to the provisions of this Master Program.~~

~~e. Wetland rating system. Wetlands for the purposes of the SMP shall be categorized in accordance with the Washington State Wetland Rating System for Western Washington—Revised (Ecology Publication #04-06-025).~~

~~d. Wetland buffers. Wetland buffers for the purposes of this SMP shall be determined based upon Appendix 8-C of “Wetlands in Washington State Volume 2: Guidance for Protecting and Managing Wetlands FINAL April 2005 Ecology Publication #05-06-008” based on information provided as part of a critical area study.~~

e.b. Development proposals shall adhere to the applicable submittal requirements (a critical area report specific to the critical area) as specified in the Critical Areas Ordinance regulations adopted as part of this SMP.

f.c. Development shall not intrude into, over, or within 10 feet from *critical saltwater habitats* (e.g., eelgrass) except when an alternative alignment or location is not *feasible* and the development would result in no net loss of *critical saltwater habitat*.

g.d. When this Master Program requires mitigation, the mitigation sequence described in section BMC 20.30.010 [Impact Mitigation] shall be followed.
