Hi,  
The City of Burien has been sweeping the streets since the end of the snow storm from the south end city limits and working its way north. However, today the City is starting a new plan to start sweeping from SW 116<sup>th</sup> Street just west of Ambaum Blvd. SW and work its way south.  
The City has one truck only to sweep the entire city. It takes a few minutes to spread the sand truck but it takes approximately four hours to pick it up the same amount of sand. The City will concentrate on the hilly sides as a priority but will stay in a general area at a time. If you have any concerns feel free to contact me.

Thanks,

Hello Burien City Council,

What is the plan for cleaning up all the sand that was spread on the streets this winter? It is a hazard to bicycle riders. I'm especially concerned about hilly areas, not only because there was more sand distributed, but because it makes it even more hazardous to riders. This is an issue on the main thoroughfares as well as the more scenic and hilly streets used by many bicyclists for recreation and training.

Thanks,  
Jen
